In today's times, a mere management certificate cannot suffice the niche needs of specific skill sets in the industry today. Especially since work place evolved post the pandemic and with science, technology and management practices changing at an ever- increasing rate, a gap is formed between the foundation provided by an academic education and the technical and management competencies required in today's technical and business environment. Thus, we here at IIBM, decided to give that extra edge to our student leaders through professional certification programs in order to bridge the education gap, arising out of this change.

International IV's

The ten days international immersion program of IIBM is the crown jewel of the full time MMS program, nurturing our student leaders to become globally sensitized world citizens. The last three years was a learning expedition to Thailand, Dubai and Malaysia of global engagement which gave our students an opportunity to learn the language of global business, engage completely with global issues and transform into informed global citizens. International immersions act as robust and highly impactful launching point of the program for our MMS student leaders designed to offer an immediate introduction into foundational business principles in a global context. 2023 was a restart after the global lockdown of two years, when we visited Sri Lanka for the International IV.
